

Introduction To Pandas

- Created by Wes McKinney in 2008.
- Can be used together with Python to manipulate, clean and query data by looking at the Pandas data tool kit.
- Pandas has become the defacto library for representing relational data for data scientists.

Stack Overflow & Pandas

- Stack Overflow is used by the software development community to post questions about programming. The unique part of it is that it is curated by the community.
- Pandas community sees Stack Overflow as their number one resource for helping new members.

Other Resources

- Books to Consider: **Python For Data Analysis** by Wes Mckinney, **Learning the Pandas Library"** by Matt Harrison.
- Websites: planetpython.org by Marco Rodriguez and Tim Golden.
- Podcasts: **Data Skeptic** by Kyle Polich
